

Angel of the World

“Because there is no consensus among us ... and man cannot find what is nearest to him, the Angel has come to us.

He brings the largest common denominator to everyone whose dedication is the [hitherto best and therefore most integral] truth.

There is no conflict between real scientific and cultural cognition, between real philosophy and politics, even not between real science and spirituality if you know the Angel's gifts: the integral thinking and revolution which can make you see completely new with your Firery Eye.”

George M Grow Jr

Grow's Phantastic Realism [Real Fantasy] is conceptual, and that's why he presents his Angel's gifts in conceptual art either:
